

§ PROFILE

Ten years in content, brand, and growth for technical audiences in crypto. Writing sits at the intersection of philosophy, political economy, and technical depth — that foundation makes security and governance legible to audiences who need to act on it. Published work includes a post-mortem on the Futureswap governance attack, opening with medieval tally sticks and Taleb before walking through flash swaps and DAO exploit mechanics.

Most recently led BD pipeline and partner qualification at Moonwell. Before that, led content, brand, and growth at Blockful and Anticapture, with governance security engagements across Uniswap, ENS, Optimism, and Arbitrum. Taught crypto at MBA level and produced bank certification content through ANBIMA.

§ WRITING

Growth, branding, and demand generation for security.

Security marketing is hard because of normalcy bias: organizations invest after incidents, not before. Breaking that cycle means translating invisible risk into felt urgency, shifting potential clients from the quadrant of things they don't know they don't know into the quadrant of known risks they can act on. That's a messaging and growth problem before it's a sales problem. It's work I've done at Blockful for protocols and foundations, and at Criptonomia for large Brazilian industrials.

§ EXPERIENCE

- Growth Lead — BD & Partnerships

2025 — PRESENT

Moonwell · Lending protocol on Base & Optimism

Built and owned the BD pipeline for the largest onchain lending protocol on Base. Work covered partner meetings, prospect qualification, active outreach, event presence, and awareness growth across DeFi, consumer apps, and fintechs.
- Growth Lead — Content, Brand & Security

2023 — 2024

Blockful · DAO governance & security · anticapture.com

Led content, brand, and growth for a governance security research team. Worked with protocol teams and foundations on hostile takeover defense across Uniswap, ENS, Optimism, and Arbitrum.

- Authored long-form security research mixing political economy, philosophy, and technical analysis, written for protocol engineers and institutional stakeholders.
  - Developed branding from scratch, directing the designer and building the visual identity. Specified and developed product features to aggregate clients and generate demand.
  - Spoke on hostile takeovers and governance attacks at ETH Denver and ETH LatAm.
  - Ran @blockful\_io and @anticapture using AI production stack: Claude, Runway, custom prompt libraries, AI + Figma pipelines.
- Growth & Community Lead

2024 — 2025

Balancer · DeFi protocol · AMM infrastructure

Led growth and community for a foundational DeFi protocol. Built speaker programs, event strategy, and ecosystem positioning across the Ethereum and DeFi communities.
- Earlier — Growth, Content & Marketing

2015 — 2023

NFTFY · Criptonomia · RadarFit · Crypto, NFT & healthtech

Led growth and content end to end across three companies spanning early NFT, institutional crypto, and consumer healthtech. At Criptonomia, sold smart contract-based dispute resolution to large Brazilian industrials. At RadarFit, built growth and content for a consumer health product pre-Web3.

§ SPEAKING

- ETH Denver

ETH Argentina

ETH Belgrade

ETH LatAm

SmartCon

ETH Floripa

§ TEACHING & CONTENT

- ANBIMA

Crypto certification content for banks — institutional audience
- Universidade Católica de Pernambuco

MBA professor — Crypto & Web3
- Descomplica

MBA professor — Crypto & Web3

§ DETAILS

- Domain

- GTM strategy & growth engineering
  - Demand generation for security and DeFi products
  - Security & governance content
  - Thought leadership & long-form research
  - Content distribution across paid, social & events
  - AI-accelerated content workflows
  - BD pipeline & partner qualification
- Languages

- Portuguese — native
  - English — fluent
  - Spanish — advanced
  - French · Russian — intermediate
- AI Stack

- Claude · Runway · ChatGPT
  - Custom prompt libraries (authored)
  - AI + Figma pipelines · dither & motion
- Education

- B.A., Literature & Linguistics — focus on Literature and Economics
